Printable Measuring Tape

1. **Print the measuring tape in portrait format**

    Please make sure that the printer doesn't change the aspect ratio. Therefore use the option „print at actual size of the document".

2. **Check the correct size of the scale** with a ruler. For us it is fine to have variance of 1-2 mm.

3. **Cut out the measuring tape**

4. **Measure the circumference of your pipe.**

    Enter the value in our contact form. We now can send you the suitable Merus Ring.
